Dear Sir,

I am writing at the request of Clean Water Action, whose research indicates that the proposed solutions incorporated in the CALFED program will not work. They say that the only real lasting solution is water conservation.

I have not read their research carefully, but their conclusion about our generally wasteful habits accords with the general

tenor of North American life.

If, indeed, they are right, I for one, would be willing to cooperate to conserve water usage.

Sincerely,

Kenneth L. Brown
