Lester Snow
CALFED Ex. Director
1416 9th Street, Ste. 1155
Sacramento, CA 95814

Dear Exec. Director Snow,

Please consider this letter a response to the revised CALFED plan.

I urge CALFED to expand water efficiency, conservation and reclamation programs to more reliably and efficiently use resources and know-how to stretch our existing water supplies instead of building or refurbishing new dams and canals. By approaching projects with the idea of helping to regenerate and reserve native species to areas we will benefit the entire California community.

Thank you for your time and consideration.

Sincerely,
Michelle Ellard
