CALFED BAY-DELTA PROGRAM

Public Comment

Date 7-21-99

The CALFED Bay-Delta Program welcomes your participation. Please use the space below for your written comments (attach additional sheets if necessary).

Comments: Please ivest in more water efficiency before deciding to build new dams and expand reservoirs.

To Whom it may Concern,

More fresh water needs to flow through the bay to restore habitat and environment. It is essential that we implement more aggressive water conservation practices before Calfed decides if it should build more dams and expand existing reservoirs. These actions will cost taxpayers money and further degrade the Bay-Delta ecosystem. Agriculture uses over 80% of the states water supply. A small reduction in the amount of water loss to evaporation achievable by switching to more efficient technology, can resault in significant water saving.
