SEP 13 1999 874

Dear Mr Snow

As a resident and voter in Northern California as well as a person who enjoyes the recreational activities available here, I would like you to please consider the conservation issues regarding the proposed CALFED surface Storage Projects

I do not have any immediate recommendations or solutions to the complex problems facing your tasks, but it would be a great injustice to compromise the prestine water ways and rivers in Northern California that are enjoyed by many

Thank you for your efforts and dedication to this important work.

Best Regards

Jeffrey West
