Public Comment

Date Sept 21, 1999

The CALFED Bay-Delta Program welcomes your participation. Please use the space below for your written comments (attach additional sheets if necessary).

Comments:

California continues to grow, we encourage that growth and that growth will demand water. Environmental concerns continue to expect a higher percent of our available water supply. Agriculture which is a staple of any society is continually targeted as a means of water. "Get real" California needs the economic advantages our agricultural industry provides - cheap reliable food and fiber. To accomplish all this we better develop alternative sources of water - we need more storage.
