Date: November 1, 1996

To: Interested Parties (Existing Conditions/No Action Alt. Mailing List)

From: Lester A. Snow, Executive Director
CALFED Bay-Delta Program

Subject: Third Meeting - Assumptions for Existing Conditions and the No-Action Alternative

You are invited to attend the next meeting on November 15, 1996, to continue our discussion on assumptions that need to be developed for the CALFED Programmatic EIR/EIS existing conditions and the No-Action alternative. The meeting is scheduled for 9:00 a.m. to 12:00 noon, in Room 1206 of the Resources Building, 1416 Ninth Street, Sacramento. Enclosed are the following materials:

- Draft Agenda.
- Notes summarizing the discussion from the October 11, 1996 meeting.
- Comments from Jim White to Rick Breitenbach re: Mokelumne River flows.

At the meeting we propose to address points we have previously discussed, which need further clarification, and those that remain unresolved. Specifically we will focus on Delta water quality standards, CVP/SWP demands, CVPIA's 800,000 acre-feet for fish and wildlife, Mokelumne River flows, Sacramento River water contracts, DWRDSM assumptions concerning interior Delta barriers, drinking water regulations and agricultural subsidies. We will pass out an information package covering these items at the meeting.

Please remember to bring the blue notebooks we provided at the last meeting along with this package. For those of you that were unable to attend our last meeting, we have several extra copies of the notebooks which we will make available at our next meeting.
