From: Lester A. Snow, Executive Director
CALFED Bay-Delta Program

Subject: No-Action Alternative and Cumulative Impact Analysis Screening Report

Enclosed for your information and review is the CALFED Bay-Delta Program No-Action Alternative and Cumulative Impact Analysis Screening Report. The report includes all input received from the June 11, 1996 workshop. Also, attached is a revised Table 2 from the workshop information packet. We would appreciate any comments you might have by October 24, 1996.

For those of you that have misplaced your workshop packet, Table 2 is a listing of the many resource categories that will be described in the Affected Environment section of the CALFED Bay-Delta Program EIR/EIS. In addition, the table lists the historic periods which will be used to understand how the current conditions that have come about and it also lists the periods of time that are necessary to portray the variability of the resources.

Now that we have a good sense of what projects will be in the No-Action Alternative and cumulative impact analysis, and what resource categories will be included in the affected environment description, we intend to focus our efforts on operating and regulatory assumptions. CALFED appreciates your continued involvement in helping to define the projects and the operating and regulatory assumptions that should be included in description of the affected environment and the No-Action Alternative.

If you have any questions about the enclosed material, please contact Rick Breitenbach at (916) 657-2666.
