Dear Hester Snow:

I am an ordinary citizen, living in the dense population of Southern California. It is now time to stop and think carefully about preserving our children's future. The "Smart Alternative" provides the best answer to the water resource problems of our area.

- This alternative provides protection for the watersheds
- Conserves and uses water more effectively
- Will restore this state's birds, fish and other wildlife

Please consider these thoughts when you vote and I also request these comments be entered into the formal record of the Draft Programmatic Environmental Impact Report as prepared by Lester Snow (CalFed Executive Director)

Sincerely,

Margaret R. Davis
