Lester Snow
CalFed Executive Director
1416 Ninth St. Suite 1155
Sacramento, CA 95814

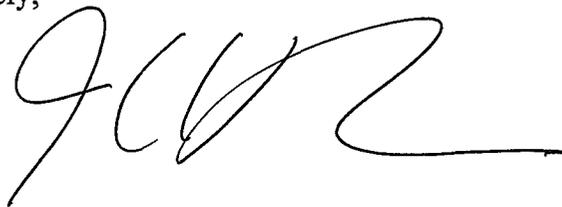

Dear Executive Director Snow:

You have an opportunity to affect something as vital to California's future as its water supply. For our sake, and particularly for the sake of future generations who will have to live with the consequences of your actions, I urge you to ensure that CalFed creates and selects a "Smart Alternative" (a fourth alternative) based on conservation and restoration to provide ample and high quality water for California's families, wildlife, farms, and businesses into the 21st century. The "Smart Alternative" would:

- restore & protect our watersheds & groundwater basins for high-quality, reliable water for people and wildlife
- ensure effective conservation programs and economic incentives to use our water more effectively
- maximize water efficiency before even considering costly new dams, reservoirs and canals
- restore California's fish, birds, wetlands, rivers, delta, and bays

Please enter these comments into the formal record for your Draft Programmatic Environmental Impact Report and Statement.

Sincerely,

C-010231
