Subject: The CalFed Bay Delta Program

Dear Mr. Breitenbach,

We have concerns about CalFed's long term plan to change the way water is now managed in the State of California.

We urge you to avoid building costly and damaging canals, reservoirs and dams and to focus on returning fresh water flows to the Central Valley rivers, streams and the Sacramento-San Joaquin Delta.

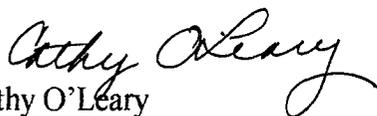

In your efforts to supply water to urban areas, agriculture and the environment, we encourage you to make sure enough water is allocated to support wildlife, fisheries and the restoration of watersheds.

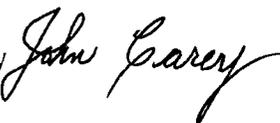

We feel it is imperative to invest in conservation and efficiency before turning to more environmentally destructive and expensive solutions.

Lastly, conservation and innovation must be a major focus in developing a long term plan to change the way water is now managed in our state.

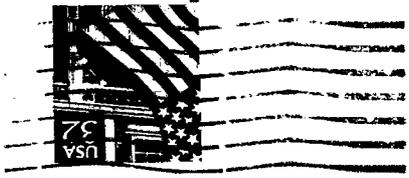

Thank you for your attention to our comments.

Sincerely,

Cathy O'Leary

John Carey
