Sacramento, CA 95814

Dear Executive Director Snow:

Please be careful to think about what kind of California we want for our grandchildren when considering the alternatives for the Shasta dam. I urge you to ensure that CalFed creates and selects a fourth alternative which is based on conservation and restoration to provide water for California's families, wildlife, farms, and businesses into the 21st century. Such an alternative would:

- 1) Ensure efficient conservation programs and economic incentives to use water more efficiently.
- 2) Maximize water efficiency before considering new dams, reservoirs and canals
- 3) Restore and protect our watersheds and groundwater basins for high quality, reliable water for people and wildlife.
- 4) Restore California's birds, fish, wetlands, rivers, deltas and bays.

Please enter these comments into the formal public record for your Draft Programmatic Environmental Impact Report and Statement.

Sincerely,

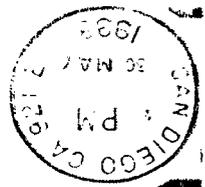

Joe Calavita
