JUN 02 1998

Dear Mr. Snow,

I am writing to your office to express my opinions on the ongoing issues of water resources for the state of California.

I feel that the state needs to focus on increasing the efficient use of our present water supplies resources than increasing the supply. I favor greater reclamation and conservation efforts as opposed to the building of new dams and canals. These conservation efforts must increase in the home and business, and especially in agriculture.

Thank You
