Dear Director Snow:

I urge you to make sure that CalFed makes the right choice for high quality water in California, based on conservation and restoration. The "smart alternative" would ensure effective conservation programs and economic incentives, maximize water efficiency, restore and protect our watersheds & groundwater basins, and restore California's fish, birds, wetlands, rivers, delta, and bays.

Please enter these comments into the record for your Impact Report and Statement.

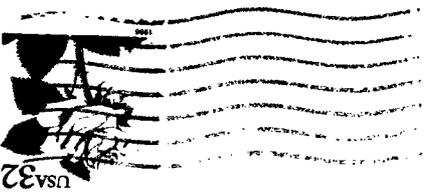

Sincerely,

Martha Baird Senturia
