RE: Support "Smart Alternative" for CalFed Bay/Delta Program

Dear Director Snow:

Conservation and more efficient use of existing developed water supplies represent the most effective and economical way to protect the Bay/Delta system. I urge you to ensure that CalFed selects an alternative that focuses on water conservation, efficient use of existing sources, and environmental protection and enhancement. We don't need huge new engineering and construction projects that will cost billions of dollars and create additional environmental impacts. Water conservation, especially in agriculture, can deliver the most bang for the buck.

Please enter these comments into the formal record for the CalFed EIR/EIS.

Sincerely,

David Burch
