Give Us Your Input!

Public input from thousands of Californians has already helped shape the CALFED Bay-Delta solution. However, there are many significant issues that need to be decided. Please fill out this form and tell us what you think is important when developing an equitable, feasible and durable Bay-Delta solution.

Comments: ① do not give/sell away ground water to municipalities, organizations, government agencies outside the area being pumped.
② The Bay/Delta problem is really not a problem if some fresh water continues to flow to the Bay. One only needs to look at the volume of flood water to see that there is plenty of water. What needs to be done is to divert run off water to storage facilities, dams, reservoirs etc. The stupid environmentalist should be the last to be considered seeing their main objective is to bankrupt American business.

Use additional sheets if necessary.

Please fold, staple and return to:
