Dear Executive Director Snow,

I urge you to ensure that CalFed puts forth and selects a new "Smart Alternative" based on conservation and restoration to provide reliable, high-quality water for California's people and wildlife. The "Smart Alternative" would:

- ensure strong conservation programs and economic incentives to use our water more efficiently;
- maximize water efficiency before even considering costly new dams and reservoirs or a Peripheral Canal;
- restore and protect our watersheds and groundwater basins;
- restore California's fish, birds, wetlands, rivers, delta and bays.

Please enter these comments into the formal record for your Draft Programmatic Environmental Impact Report and Statement.

Sincerely,

Jim Martin
