Give Us Your Input!

Public input from thousands of Californians has already helped shape the CALFED Bay-Delta solution. However, there are many significant issues that still need to be decided. Please fill out this form and tell us what you think is important when developing an equitable, feasible and durable Bay-Delta solution.

Comments:

After careful study of your proposed solutions to the Bay Delta problems I have concluded that there should be much more emphasis on conservation and less on construction. The electric power industry is an example of what can be done with economic incentives to increase conservation and efficient use of resources. Let us consider less costly alternatives.

Use additional sheets if necessary.
