

We emphatically oppose a CALFED plan that will be as devastating and damaging to agriculture as this plan is. CALFED will ultimately wreck havoc on the agriculture industry and the economy of the entire state. There is little, if any, benefit to California agriculture, yet it is agriculture that will be most severely impacted. Until the plan is drastically improved and changes made that will ensure the viability of California agriculture, we will remain vehemently opposed CALFED's proposed "solution."

We emphatically oppose a CALFED plan that will be as devastating and damaging to agriculture as this plan is. CALFED will ultimately wreck havoc on the agriculture industry and the economy of the entire state. There is little, if any, benefit to California agriculture, yet it is agriculture that will be most severely impacted. Until the plan is drastically improved and changes made that will ensure the viability of California agriculture, we will remain vehemently opposed CALFED's proposed "solution."
