CITY/STATE/ZIP

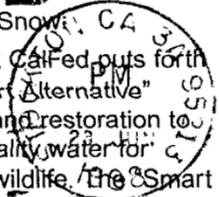

Dear Executive Director Snow, CA
I urge you to ensure that CalFed puts forth
and selects a new "Smart Alternative"
based on conservation and restoration to
provide reliable, high-quality water for
California's people and wildlife. The "Smart
Alternative" would:

- * ensure strong conservation programs and economic incentives to use our water more efficiently;
- * maximize water efficiency before even considering costly new dams and reservoirs or a Peripheral Canal;
- * restore and protect our watersheds and groundwater basins;
- * restore California's fish, birds, wetlands, rivers, delta and bays.

Please enter these comments into the formal record for your Draft Programmatic Environmental Impact Report and Statement.

Please save something for the future.
Sincerely, *Ruth A. Davis*

you know if you all don't take care of the H₂O the environment. We will all suffer and there will be no H₂O for anyone. Too populous. Too much farmland being lost.
