Dear Executive Director Snow:
I urge you to ensure that CalFed puts forth and selects a new "Smart Alternative" based on conservation and restoration to provide reliable, high-quality water for California's people and wildlife. The "Smart Alternative" would:

- * ensure strong conservation programs and economic incentives to use our water more efficiently;
- * maximize water efficiency before even considering costly new dams and reservoirs or a Peripheral Canal;
- * restore and protect our watersheds and groundwater basins;
- * restore California's fish, birds, wetlands, rivers, delta and bays.

Please enter these comments into the formal record for your Draft Programmatic Environmental Impact Report and Statement.

Sincerely, *Linda Brodman*

Lester Snow
Executive Director
CalFed Bay/Delta Program
1416 Ninth Street
Suite 1155
Sacramento, CA 95814

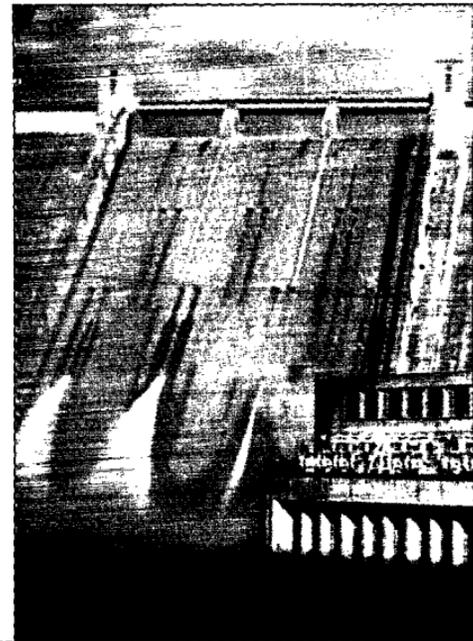

Furthermore, with ↑ in population in CA there will be further impacts to water (& other) ecosystems. CA leaders need to address growth overpopulation. Green #'s will outpace all conservation measures in the long run!
