Dear Executive Director Snow:
I urge you to ensure that CalFed puts forth
and selects a new "Smart Alternative"
based on conservation and restoration to
provide reliable, high-quality water for
California's people and wildlife. The "Smart
Alternative" would:

- * ensure strong conservation programs and economic incentives to use our water more efficiently;
- * maximize water efficiency before even considering costly new dams and reservoirs or a Peripheral Canal;
- * restore and protect our watersheds and groundwater basins;
- * restore California's fish, birds, wetlands, rivers, delta and bays.

Please enter these comments into the formal record for your Draft Programmatic Environmental Impact Report and Statement.

Sincerely, *LaRue W. Martin*

P.S. Restrict development in flood plains to prevent disasters in future.
