Attachment A

Project Location: San Francisco Bay-Sacramento/San Joaquin River Bay-Delta and their corresponding upper watersheds; Southern California water systems' service areas; and off-shore areas from Morro Bay to the Oregon border.

Development Type: Programs include Ecosystems restoration, water quality, water use efficiency, levee system integrity, water transfer, coordinated watershed management, and storage and conveyance actions.

Project Description: To develop a long-term comprehensive plan that will restore ecological health and improve water management for beneficial uses of the Bay-Delta system. The project purpose includes the four primary and interrelated objectives which address the key areas of water quality, water supply reliability, ecosystem quality, and vulnerability of Delta levees and channel systems and uses the solution principals to achieve the objectives.

Geographic Scope of CALFED Problem and Solution Areas
