Appendix M2. Cultural Resource Survey Information for the Delta Wetlands Project Islands

SURVEY INFORMATION

Tables M2-1 through M2-4 show the cultural resource information obtained during surveys of the DW project islands. The tables present the site numbers, temporal units, resource types, site characteristics, and landforms of the resource sites. The tables also indicate each site's cultural association and whether the site has been determined eligible for inclusion in the National Register of Historic Places (NRHP).
