

**OFFICE MEMO**

<b>TO:</b> Katie Wadsworth	<b>DATE:</b> May 27, 1999
<b>FROM:</b> Bob Niblack 	<b>SUBJECT:</b> Recent Monitoring Data from Ryer and Prospect Islands

Monitoring data collected at the request of DWR's Environmental Services Office in support of the Prospect Island Restoration Project is transmitted to you with this memorandum so that it can be included in the Army Corps of Engineers' Ecosystem Restoration Report for the Project. The data extends the monitoring record to the most recent monitoring event. Data collected previous to the attached data was included in a report forwarded to the USBR on January 21, 1999.

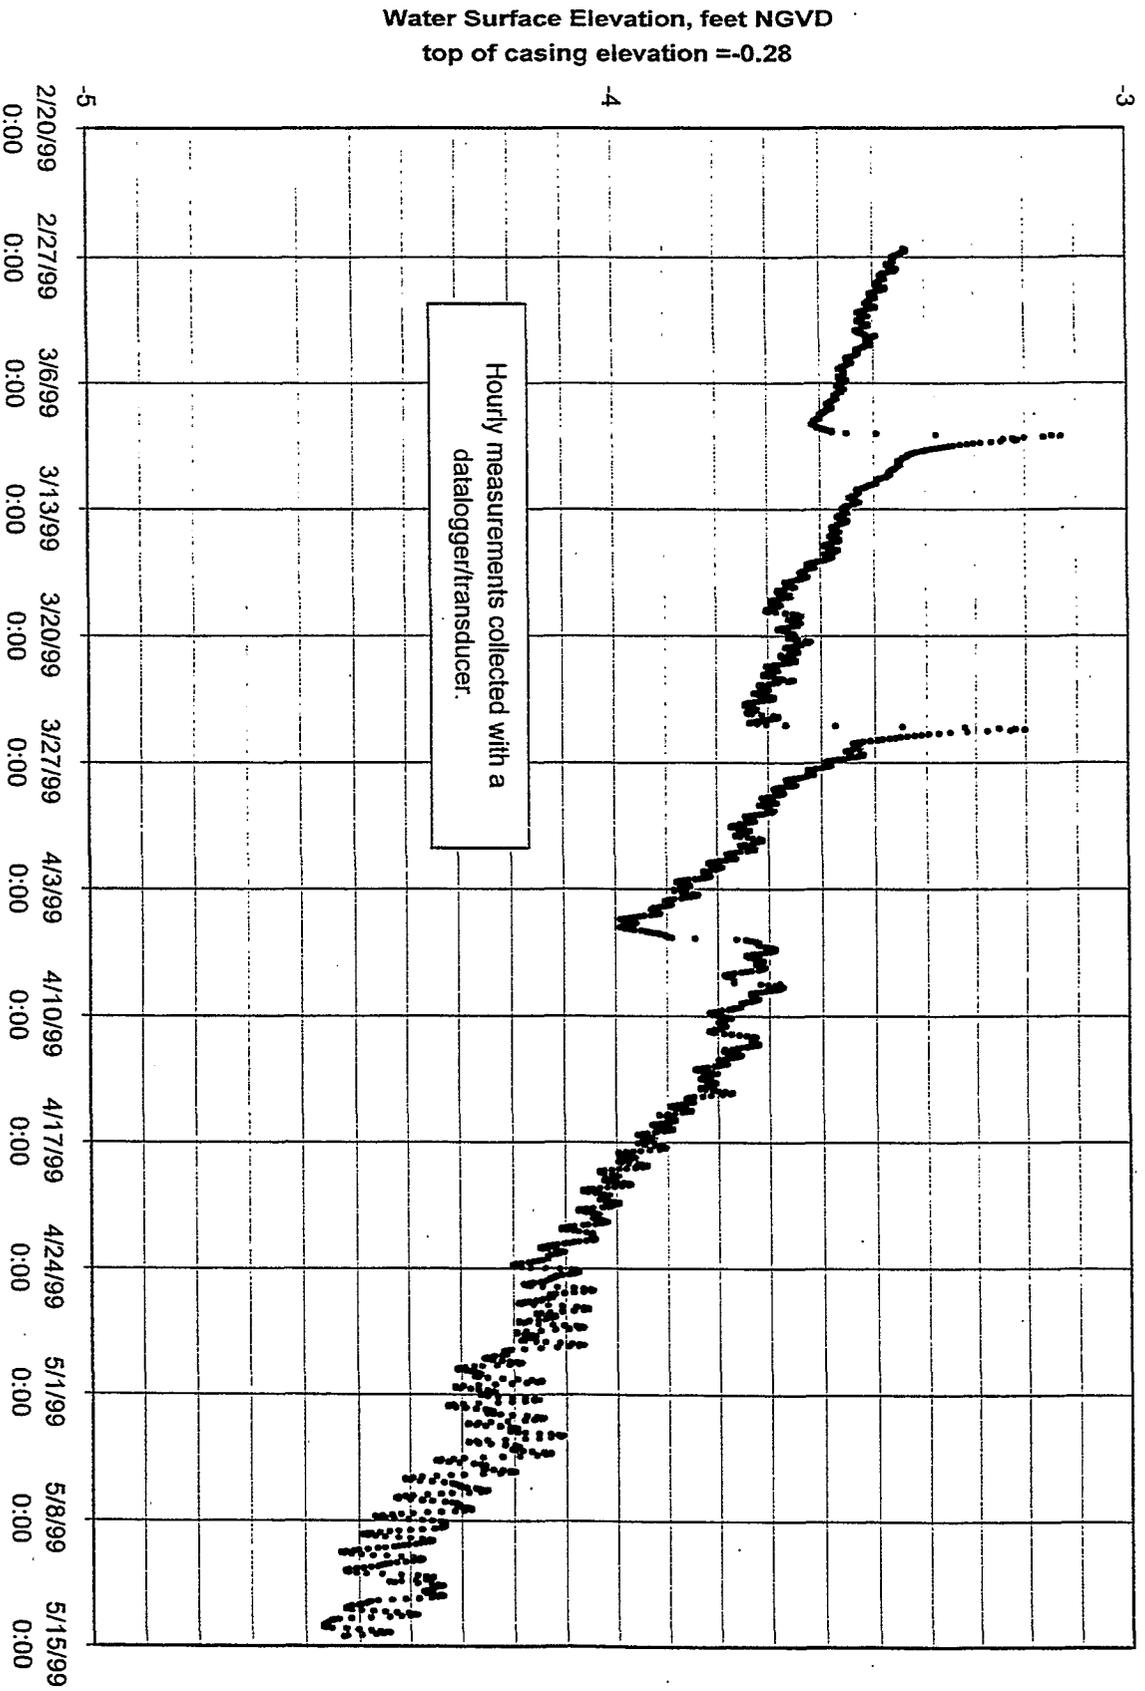

The following data are included in this package:

- Groundwater elevations in Well R-1 on Ryer Island from 2/26/99 to 5/14/99 measured on an hourly basis.
- Groundwater elevations in three wells on Prospect Island from 10/27/98 to 5/14/99 measured on a weekly basis.
- Groundwater elevations in five wells on Ryer Island from 10/27/98 to 5/14/99 measured on a weekly basis.
- Surface water elevations on Prospect Island from 10/13/98 to 5/14/99. The record from the USBR collected with a datalogger every two hours from 10/13/98 to 11/13/98 is plotted along with measurements collected with a tape once per week from 11/3/98 to 5/14/99.
- Stage in Miner Slough collected hourly from 8/3/98 to 4/12/99.

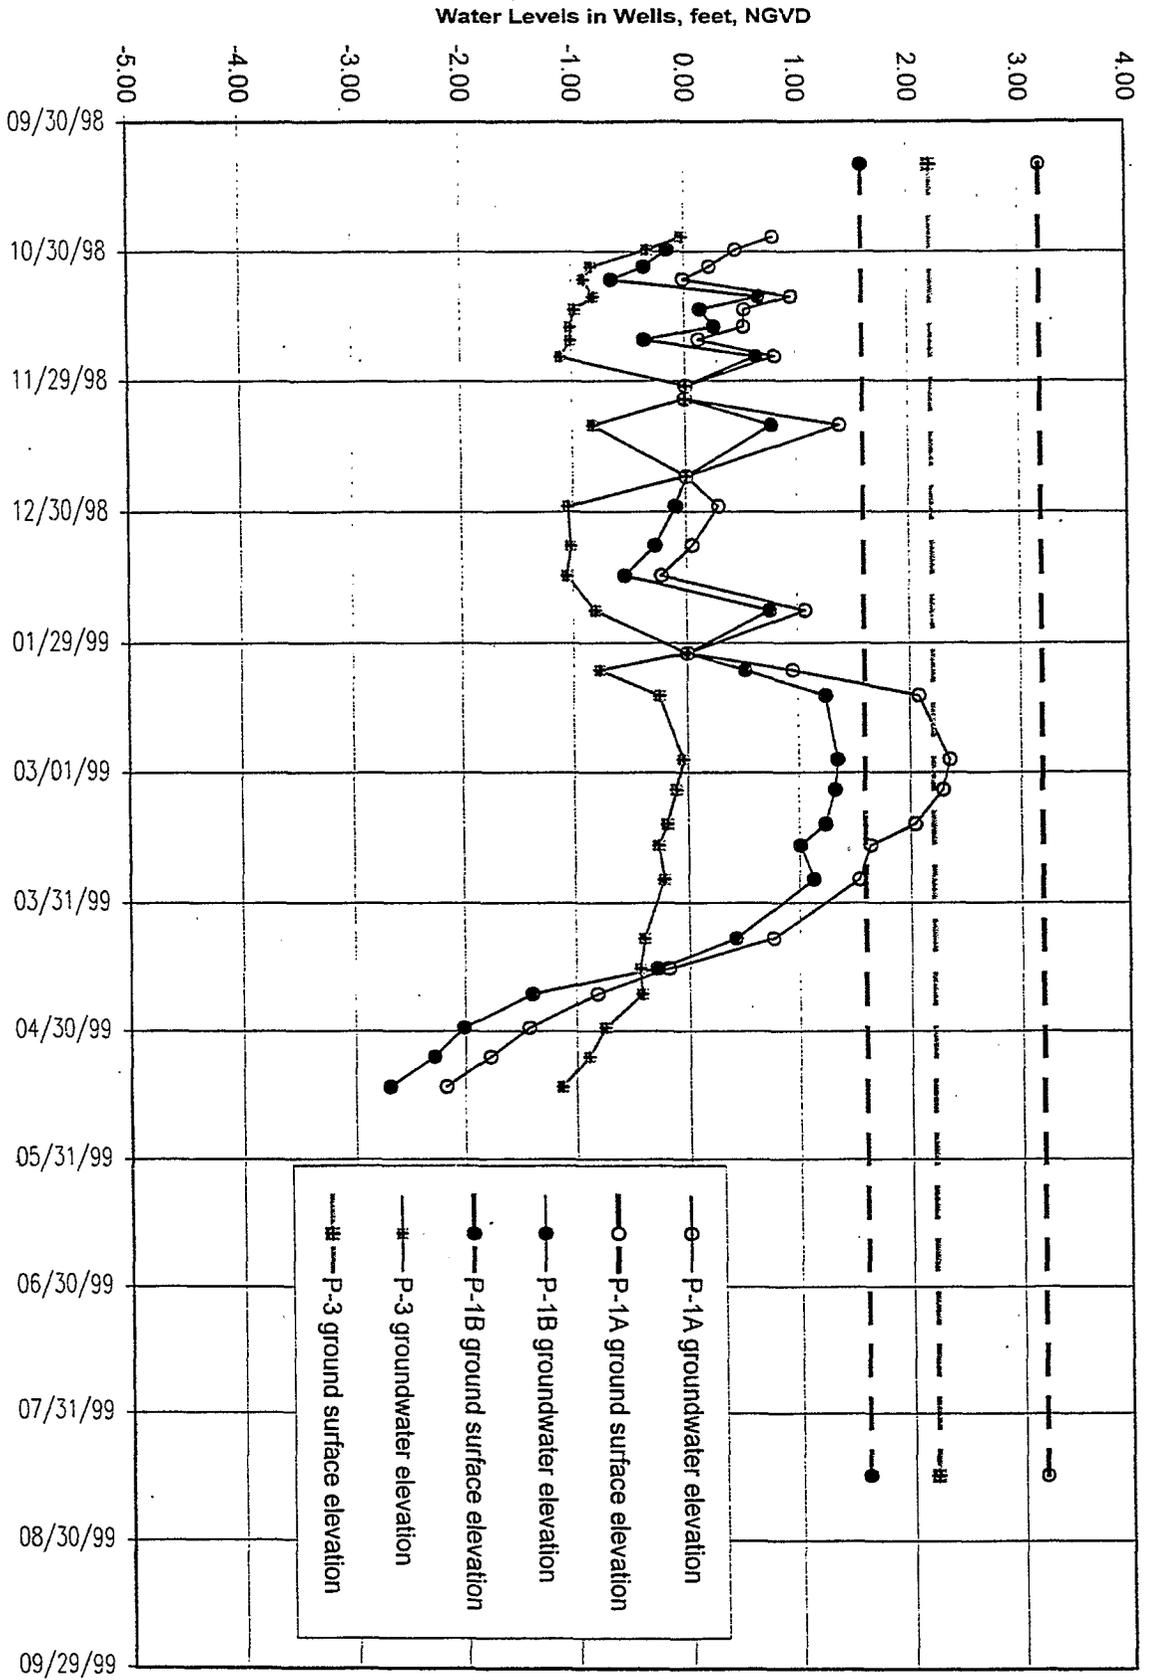

If you have any questions, please call me at 227-7601.
