RE: Clear Creek Prescription

Dear Mr. Snow,

Many community member hours have been devoted to refining the Clear Creek watershed analysis that was prepared by the Western Shasta Resource Conservation District (WSRCD). Many more hours have been donated by local landowners like myself to establish partnerships with agencies and to establish a plan for conserving and restoring our watershed.

While you review WSRCD's application for CALFED funds, also consider the time and effort by local landowners and agencies that has already been devoted to achieving our common goals.

CALFED's support of our watershed management efforts will result in tangible improvements that other communities will seek to emulate.

Cordially,

Dana G. Meaney
