Subject: Lake Englebright Dam Proposal

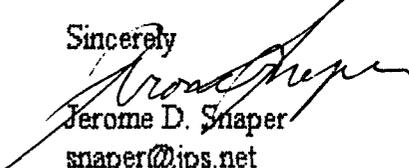

Dear Sir,

Lake Englebright is extremely important to the environment and economy of this area and its destruction could seriously impact the Eagle and wildlife populations.

It is likely that Lake Englebright is essential to keeping the aquifer charged and its loss would seriously impact well production in a wide area below the lake resulting in a disastrous loss of property value.

The loss of a fine recreational area would be a disgrace upon any agency promoting changes to Lake Englebright dam.

Sincerely

Jerome D. Snaper
