Mr. Rick Breitenback
CALFED Bay-Delta Program
1416 Ninth St., Suite 1155
Sacramento, CA 95814

August 27, 1999

CALFE was devised to cure the water problems of California. We cannot solve our water problems by reappropriating water supplies or taking farmland out of production at a huge cost to the consumers of California.

The real solution is to develop and save more water in wet time by building many more dams. The money that CALFED will spend for land set aside and other programs will eliminate untold numbers of jobs in over 50% of agriculture and supporting industries. Building water storage facilities will cause many new jobs and not eliminate jobs in California.

We are all for saving fish and wildlife by generating more water. Radical environmentalist should put up their money to develop more water for fish and wildlife.

Keep control of water in California, not in the muck of Washington D.C.

Sincerely,

Thomas S. Gotelli
President
