Dear Mr. Breitenbach:

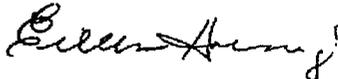

I would like this to be part of the public comment for CALFED's Bay-Delta Program.

As new environmental studies are made we may have to rethink our solutions. Let's be careful how we approach the Bay-Delta Program.

What I would like to see is a plan that is based on realistic needs, does not disturb fish and wildlife but actually acquires and restores wildlife habitat, and does not involve the new dams or offstream storage, and improves water quality by enforcing pollution limits.

Thank you for listening

Yours truly,
