Mr. Lester Snow, Executive Director
CALFED Bay-Delta Program
1416 Ninth St., Suite 1155
Sacramento, CA 95814

Dear Mr. Snow:

As Executive Director of CALFED you are in a position of influence within your agency and the recommendations that it hands out. As a life-long resident of the Bay Area (69 years) I am well aware of all the tugging that goes on within our area and the State as far as water is concerned. I recognize the amount of pressure that CALFED has been subjected to by the agricultural interests of this State and I would like to subject you to the pressure of one individual who, sadly to say, has seen the waterways of his beloved state run so low that they are dying a slow death.

I urge you and your agency's current plan to enlarge and install new dams be altered and changed in order to save a precious and clean resource. We really don't need more dams -- we do need to conserve our natural resources.

Thank you,

Harry Kamian, Jr.
