Dear Mr. Breitenbach,

I am writing you to express my concerns about the CALFED program. I urge you and your colleagues to adopt a plan that maximizes water efficiency and conservation. Please work toward a plan that removes barrier dams, increases instream flows and acquires and restores habitat for fish and wildlife. A plan that does not rely on proposed dams raises or new offstream storage reservoirs is what we need. This plan also needs to improve water quality. It should enforce pollution limits.

Thank you for your consideration of these issues.

Sincerely,

Karen Boness
