Mr. Lester Snow, Executive Director
CALFED Bay-Delta Program
1416 Ninth Street, Suite 1155
Sacramento, California 95814

Dear Mr. Snow:

There are more than enough environmentally destructive dams in California; we don't need another one just to appease the demands of the agribusiness giants.

Our salmon and trout populations have declined dramatically, and they are so important they deserve all the help they can get.

Please! No more dams in California.

Sincerely yours,

Theodore J. Trichilo
