

SEP. 15

1354-1

Mr. Lester Snow, Executive Director  
CALFED Bay-Delta Program  
1416 Ninth Street, Suite 1155  
Sacramento, CA 95814

INSTEAD OF NEW DAMS PLEASE USE ground-  
water storage, better levees, AND different and  
more conservation methods - I believe these would be  
very effective with good outcome. With <sup>more</sup> dams and  
NOT doing the above plan we will have more problems.

Dear Mr. Snow,

Your agency's bias towards further dam construction poses a grave peril to  
California's wild fish, including its native salmon, trout and steelhead.

While we all understand that human needs must be balanced with the needs of  
animals, there is no balance in destroying California's rivers and streams for the benefit  
of agribusiness giants.

The millions of Californians who enjoy, and depend on, California's outdoors  
don't need more dams — they need better water conservation and management.

I urge you to use the forces of the free market to encourage the development of  
new efficiencies. This will save California's wilderness, boost conservation, and benefit  
everyone in the long run. Please write me back to let me know where you stand on this  
important issue.

Very truly yours,      1) Karen L Jacobson
