

CONTACT MEMO

Contact: Dave Rosenburg and Freddie Oakley, Yolo County Board of Supervisors
Date: June 25, 1997
Setting: Two Meetings in Davis

Chuck Cunningham with Cunningham Engineering and I met with Dave Rosenburg and Freddie Oakley individually to discuss CALFED conjunctive use issues. Both meetings were similar in that the supervisors expressed much interest in learning about the CALFED program. As a result, each meeting consisted primarily of me answering questions about CALFED and Yolo County groundwater issues. Both supervisors were very supportive of the CALFED program and were interested in helping to facilitate a conjunctive use workshop in Yolo County.

As a follow-up, I sent some information on groundwater management to Dave Rosenburg and worked with Freddie Oakley to set-up a Yolo County conjunctive use workshop for October.
