

TEHAMA FLY FISHERS

P. O. Box 224
Red Bluff, California 96080

Cal Fed
Dick Daniel

Jan. 2, 1997

Dear Dick:

I had planned to attend the Meeting on Jan 3, but I find it not possible at this time because of a sprained knee while playing table tennis. Also I live in the Red Bluff area along the Sac. at river mile 239 where we have had some high water problems and I do not wish to get too far away from home right now.

I am sure you are aware of the position of Tehama Fly Fishers and the Red Bluff Fisheries Forum on Delta through flows, (West) to the ocean. Our first mention of this concern was prior to your public meeting in Red Bluff, March of last year and my conversation with you about a month later.

Some additional comments are listed here in response to Phase One Final Report, (Sept. 96).

Page 5 last Para's.: A limit determining model and decision must be developed for through Delta flows, (West), before alternates 1, 2, 3, (South) are promulgated.

Page 7, Para. 4: Agreement.

Page 13 Last Para., Last sentence. Very visionary.

Page 16 Introduction, first Para. Ecosystem of the Delta can never flourish with insufficient viable fresh water flows to the ocean.

Page 16, first column, last Para. It is inconceivable that lack of through Delta flows, (West) can be compensated for, elsewhere in the Delta.

Page 17 second Para.: Agreement.

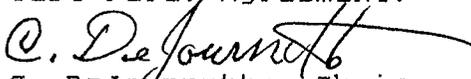

Page 17 last Para.: These exotic imported species do endanger native species. What is to be done about Striped Bass and Shad negative impacts?

Ecosystem Restoration Common Program : Must give more detailed account and attention to T.D.W's., Through Delta Flows Westerly.

Page 22 second Para. Priority consideration should be given to storage upstream of Red Bluff i.e., (Red Bank and Cottonwood Creek storage) supplied directly to users such as the Tehama Colusa Canal. This recommendation was given to CalFed early on this year.

Page 25, Some Political Concerns,: Agreement.

Page 30, Glossary. first Column, last Para. Agreement.
