Delta Levee Emergency Management and Response

GOAL

Enhance existing emergency management response capabilities in order to protect critical Delta resources in the event of a disaster.

OBJECTIVES

Enhance emergency response capabilities and resource allocation.
Develop a stable funding source for emergency response.

Suisun Marsh Emergency Management and Response

- Separate fund would need to be established for Suisun (\$2 million/yr allotted for the Delta- possibly half that for Suisun).
- Would the ACOE and other authorities be the same?
- What did we learn from the '98 floods?
