

Agricultural Drainage Actions

Other Actions

Action 8: Improve water circulation in the Delta by development of improvements at the head of Old River to block fish movement into Old River and by management of water flow and stage down Old River.

Action 10: Combined with Action 11.

Action 12: Improve source irrigation water quality in sub-surface drainage source areas. All things being equal, higher quality irrigation water will result in better quality drainage.

Action 14: Concentrate and dispose of agricultural sub-surface drainage in evaporation ponds in the San Joaquin Valley.

Action 15: Treat agricultural surface drainage and/or Delta agricultural sub-surface drainage in constructed wetlands.

Action 16: Treat a significant portion of San Joaquin agricultural sub-surface drainage by reverse osmosis or other means.
