Subject: Draft CALFED Water Quality
Affected Environment Document

No. of Pages: 1
(including cover)

In response to your 8/19/97 comments to the Draft CALFED Water Quality Program Component Report, we would like to request paragraph descriptions of the water quality monitoring programs for selenium, pesticides, metals and toxicity conducted by the CVRWQCB since 1984. Additionally, we would like to obtain similar summaries of the CVRWQCB water quality programs for the lower San Joaquin River and Grassland Area of western Merced County as mentioned by your colleague, Leslie Grober, in her 08/19/97 comments. We would like to incorporate such information into the document.

Lastly, we would like to be informed of the CVRWQCB's position on the application of 2.0 mg/l selenium criteria to wetlands in the San Joaquin Grasslands area, as recommended by the USFWS.

Should you have any questions or concerns, please feel free to call me at (916) 921-3546. Thank you for your assistance.

If you do not receive all pages, or if there are any problems with this transmission, please call 916 924 8844.
