Subject: Draft CALFED Water Quality
Affected Environment Document

No. of Pages: 4
(including cover)

Regarding your 9/10/97 comments to the CALFED Water Quality Program Component Report Draft August 1997, some interpretation is needed with regard to the desired water quality targets. Please clarify whether you are supporting Department of Fish and Game criteria or Basin Plan objectives for copper.

Additionally, we have received conflicting information from another stakeholder in the CALFED Water Quality Program regarding copper criteria. Attached please find a copy of comments from G. Fred Lee evidencing such contradiction. We would appreciate a response with respect to this matter.

Lastly, we would appreciate a copy of or the full reference to the US Environmental Protection Agency document comparing emission rates of metals from Iron Mountain Mine to industrial sources that you recommended we review.

Should you have any questions or concerns, please feel free to call me at (916) 921-3546.
Thank you.
