

**CALFED BAY-DELTA PROGRAM****Office Memorandum**

**Date:** November 20, 1997  
**To:** Sarah Holmgren  
**From:** Judy Heath   
**Subject:** Draft Comments to Richard Denton

---

I have been asked by Rick to evaluate our response. Please provide me with the sections from the San Francisco Bay/Sacramento-San Joaquin Delta Estuary Water Quality Control Plan which cites the values for chloride and TDS.

Please revamp the language under nutrients to indicate that this parameter is being considered by the PAT for inclusion on the Water Quality Program parameter list. Exclude the language in the footnote as well as the 10 mg/l value until we get PAT recommendations.

I have found no other problems. With the above corrections, we can finalize the letter to Richard Denton.

cc: Rick Woodard
