

TO: CALFED Impact Analysis Team Leaders and Consultants

FROM: Frank Piccola *Ray Mc for F*

DATE: August 4, 1997

SUBJECT: Affect Environment and Environmental Impact Technical Reports Comments

1. Attached is a photocopied set of comments received from agency reviewers for the July 1 version of the impact analysis technical reports. Some of the handwritten comments in the margins may not have reproduced clearly. Please visit my cubicle if you need to see the original set of comments.
2. Please review these comments and, to the extent possible, address technical comments that are within your purview and incorporate them into the next version of your reports. If a comment raises a policy question, let's discuss these in our weekly impact analysis team meetings.
3. If you have any questions pertaining to a specific comment, team leaders or their designees should contact the appropriate agency PCT liaison for clarification. If you are unsuccessful, please contact Ray McDowell at 653-9499 or me at 657-2666 for clarification.
4. We expect some additional comments to trickle in over the next few days. We will provide those comments as soon as we can to the appropriate team leaders and consultants.
