

ANALYSIS OF CALFED ALTERNATIVES
Ag/Urban Technical Team -- Preliminary Recommendations

DUAL CONVEYANCE

1. **Interim South Delta Program**
Necessary to increase export capacity to take advantage of favorable export conditions
2. **Screened Isolated Facility Sized as Large as Technically Justified**
Sized as large as technically justified to allow Water User Policy Group to consider trade-offs between size, assurances, and future flexibility *5,000 - 10,000 cfs*
3. **Flexible, Real Time Ops Requirements**
Same as above
4. **Integrated Banks/Tracy/Hood Operation**
Same as above
5. **Major Ecosystem Restoration Program is Contingent upon Successful Execution of a Mutually Agreeable Habitat Conservation Plan and No Adverse Impact to Water Quality**
Same as above
6. **Enlarged Los Vaqueros**
Filled from the Delta during periods of better water quality or from the isolated facility, with discharge both directly to exports and to Delta
7. **Sites or Enlarged Shasta Reservoir for Ecosystem and Northern California Use**
Same as above
8. **South of Delta Storage by Integrated Operation (With Payment as Necessary) of Existing Surface and Ground Water Storage as well as Potential Development of New Groundwater Storage**
Same as above
