RE: Water Quality Data/Information - CUWA Principles re Public Health & Safety.

Number of pages including cover sheet: *2826*

Message:

Karl:
Attached are copies of excerpts from recent testimony that EBMUD offered regarding disinfectant/disinfection byproducts in treating Delta water quality, and associated health risks of certain source water quality. I have also include some information regarding capital and operating costs of water treatment. These data were developed by Brown & Caldwell, and other experts (Richard Bull, John Gaston, Dan Okun) for EBMUD during the development of our integrated resources management plan and during the Mokelumne River water rights proceeding.

I hope this information is useful to the team assigned to develop water quality parameters in defining base water quality needs to protect public health. Let me know if you think anything in EBMUD's fortress of water quality data (such as the American River Reference Proceedings) would be of use to the team.
