Subject: Disposition of Stakeholder Comments

In furtherance of my December 23, 1996 memorandum to Steve Yaeger on this topic, I was able to reach him today. Apparently this issue has not arisen at the CALFED management level as yet. Steve intends to put this topic on the agenda for Monday morning's Program Manager's meeting for discussion. In the meanwhile, he advises us to incorporate comments into our report, and to forward all comments to Judy Kelly. Evidently it has been the practice to publish the comments along with responses. It is my understanding that Judy has the responsibility for coordinating responses to the comments as necessary.

Based on this conversation, it is my interpretation that we would not appendicize the comments to the Water Quality Chapter of our Component Refinement Report, but would act on the comments as appropriate. It is my intention to advise you if any changes in this direction result from Monday's meeting.
