

CALFED BAY-DELTA PROGRAM**Office Memorandum**

Date: April 1, 1996
To: CALFED Program Team
From: Michael Norris
Subject: Revised Water Transfer Core Action Descriptions

As per instructions from Victor Pacheco, I have compared the new revised language for the core actions for "Water Transfers" with the prior language in the February draft alternatives report. The February report listed the water transfers under the category of "Increasing Water Supply Predictability". Four core actions under Water Transfers are listed as being changed and two will apparently remain the same. The two that remain unchanged are listed in the February Report under the titles of "Manage Water Resources Data and Information for the Bay-Delta System" and "Encourage Long-Term Drought Contingency Planning". Wording that remains the same is shown in plain font whereas new wording is shown in redline font and old wording that is no longer in the latest version of the core actions is shown in strikeout font. Herein are the revised core actions for Water Transfers:
