The plans essential to our August effort should be the plans you already have, with the exception of the Salt Marsh Recovery Plan. For the Salt Marsh plan, we will meet with the Service staff persons responsible for the plan to ensure incorporation of important goals.

I will continue to track down the other plans and have copies made, however, I am not considering this a high priority for our August deadline. PLEASE let me know if you disagree and would like any of the other plans soon, so I can take care of it earlier.

Thanks,

Tiki
