

NoName Group Meeting
Friday, July 10, 1998

Participants: G. Gartrell, R. Ott, S. Roberts, N. Sandkulla, S. Rosekrans, J. Snow, K. Kelly, P. Herrgesell, A. Hinojosa, Chet Bowling, S. Buer, J. Maher, S. Arora.
Phone: S. Ottemoeller, B. Herbold, BJ Miller, Walter Ward, D. Fullerton, A. Hildebrand, V. Pacheco, M. Carpenter

Most of the meeting was spent reviewing, discussing, and augmenting to the toolbox list. The comments from the group have been incorporated into the list and are being distributed.

The CVPIA toolbox group made significant progress beyond the identification of tools. The CVPIA toolbox group assessed the cost, water supply benefits, and implementation time frame of many of the measures in detail. The "Summary of Tools" paper prepared by the B(2) Toolbox Committee, dated July 24, 1997, serves as an useful reference for a description and analysis of CVPIA tools. This work is being incorporated into the NNG tool box list in addition to a broader set of tools identified by the NNG.

The screening criteria were reviewed and altered to:

Preliminary screening criteria:

- Consistency with long-term CALFED goals and solution (preferred alternative)
- Stakeholder support
- Assurances

- Cost (operations and maintenance, mitigation, etc...)
- Funding potential
- Implementability (permitting, regulations, time frame legal issues, water rights, etc..)
- Mitigation potential and mitigation requirements

- Unresolved issues (short- and long-term)
- Conflicts with other actions

A conference call was set up for July 14 to begin assessing the broader list of tools developed by the NNG, test the criteria and review the conclusions and work of the CVPIA group.

Call details: 1-800-988-9514, password: noname, leader: Gartrell
Tuesday, July 14, from 3 pm - 5 pm.
