

#1

Biological Issues

- Scientific contention: ocean harvest, hatcheries, exotics, trophic dynamics, predation, water quality, role of adaptive mangement
- Importance of Exports
- Importance of Habitat
- Importance of Flows

#2

Importance of Exports

- Do export related salvage losses and entrainment effects have a significant effect on populations?!
- How important relative to other sources of mortality?
- How important is export induced indirect mortality?
- How important is the entrainment of eggs and larvae?
- Role of exports in estuarine foodweb?

#3

Importance of habitat

OK as is

#4

Importance of flows

- How important are flows in fish migration?
- VAMP Adaptive Management Experiment
- Need active adaptive management interventions -- Ecosystem Restoration Core Team
