

Memorandum

Date: January 26, 1998

To: CALFED Policy Group

From: Lester A. Snow 
Executive Director

Subject: Potential Land Use Changes Resulting From Implementation of the Program

The physical structures being proposed in the Program's alternatives have the potential to impact a sizable amount of acres. We suspect that a significant number of the acres that stand to be impacted are currently farmland. The attachment contains two packages. The first presents an overall estimate of the potential impact of the CALFED Program footprint. The second package presents estimates of farmland potentially impacted by the Program. The overall acreage differs between the two packages because farmland in the Bay Region is not expected to be impacted by the Program. If you have questions, please contact Rick Breitenbach at (916) 657-2666.
