California Chamber Voices Support for CALFED Process of Finding Solution to State Water Needs

Water Needed to Support California Growth

SACRAMENTO, Calif. —Allan Zaremborg, president of the California Chamber of Commerce, today released the following statement regarding the CALFED Bay-Delta Program:

“Protecting the Delta and having an adequate water supply are critical to the state’s business climate. We can’t provide jobs for a growing California without a growing water supply.

“The California Chamber of Commerce supports the CALFED process of bringing all interested parties together to work on finding an acceptable solution to the state’s water supply needs. We are committed to working with the Governor and policy leaders to make certain this crucial decision is made in a timely fashion.”
