Subject: Spring-run Protection Plan Water Quality Profile  
Cc: ggartrell@ccwater.com, rdenton@ccwater.com, dbriggs@ccwater.com

Two stations in the Spring-run protection plan have exceeded the salinity profile. Although, overall water quality is not of concern at this time given continuing increases in Delta inflows, it is likely that other stations may exceed the profile as well.

Station	Profile EC mS/cm	12/2/99 EC mS/cm
Jersey Point	1.8	1.81
Bethel	1.0	0.91
Holland	0.8	0.79
Bacon	0.7	0.72

We believe conditions have reached their peak levels ( or are likely over the weekend), and **no changes** to the Delta Cross Channel Gates are needed at this time. We will continue to monitor conditions and provide updates as needed.
